</p> <p style="text-align: justify;">Louise Abbott continues to videotape the work-in-progress on the beautiful nineteenth-century high-drive barn that Neil Manson dismantled near Knowlton's Landing and is resurrecting on his property in Austin. Here Neil and his helpers are planing the floorboards for the barn on November 27, 2011. Neil laid the floorboards over the winter. ♦ Louise will eventually produce a video documentary that will be available in DVD format.</p>
